# MANN'S PARCHMENT COPYING PAPER.

(Trade-Mark Registered in U. S. Patent Office.)

This Parchment Paper is **MUCH STRONGER** and shows a **CLEARER COPY** than any other ever made for the purpose. The ink is **LESS LIABLE TO SPREAD** and the paper can be written upon with a pen.

#### DIRECTIONS FOR COPYING.

Place a piece of blotting-board under the leaf of Copying Paper; then, with brush, wet the leaf. Take off surplus water with another sheet of blotting-paper; then place the written letter on the leaf, (leaving the blotting-paper under the leaf, to take up any excess of water that may yet remain;) place it in the press, and, in ten or fifteen seconds, a perfect copy will be secured.

The leaves **WILL DRY AS SMOOTH AS SILK**, if the book is placed in the press after Copying.

**42** Place oil-sheets between copies just made to prevent blending or setting off.

#### Another Process when many letters are to be copied.

Procure a tin or iron box, with lid, to hold 20 blotting-pads.—(Boxes furnished, if desired.)

Dip half the lot of blotters in water; let them drain off a few moments; then place a sheet between each of them; give them a few moments squeeze in press and they will remain dry for three days; then lay an oil-sheet; place it to the left; then lay a wet blotter; then take leaf of Copying paper; then lay your letter on; then another oil-sheet, and so on; and you can copy all your letters at one time; thereby saving time. With a little care and experience, at first, as to wetting, you will be so well pleased, as never to resume the old way.

To copy TYPE-WRITTEN LETTERS, the leaves require **MORE MOISTURE** than they do to Copy Letters written with **PEN AND INK**.
